

Pankhurst Health Technology Translation Toolkit

Are you developing a health technology in academia, industry, or the NHS?
Do you want to translate it for patient benefit and don't know how?

The Translation Toolkit can help you!

Software as medical device

Implantable/invasive medical device

Non-invasive medical device

Step by step guides

Discover the steps necessary to bridge the gap between research and impact in healthcare.

63%

Progress Tracker

Monitor your progress against specific targets along the translational pathway and map next steps.

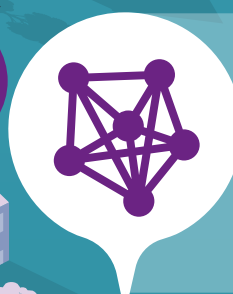

Resource database

Browse a wealth of translational resources, including information about regulatory compliance and stakeholder engagement.

Support network

Access groups and organisations, locally and nationally, that can support your translational research.

Case studies

Learn from real-world examples of successful healthcare technology translation projects.
